

XAM

Motivation: Holding an exam is costly and tiresome moreover checking the Multiple choice answer scripts are tiresome work. We want to build an app that can reduce the cost of buying paper for questions and answer scripts and reduce the repetitive workload of checking MCQ answer scripts. So any user can create their own MCQ questions and short question and take exams seamlessly online. Online exams will enable students to attend exams within their homes saving a lot of time in perspective to a vehicle filled Dhaka city.

Features:

1. Anyone can take exams without pen or paper.
2. Exam will be automatically graded (on base of the answer which would be given during making the question paper)
3. Automatic ranking and marks system.
4. One can keep track of one's performance.
5. One can participate in various kinds of exam throughout the world.
6. One can keep one's exam private or public as one's wish.
